

XE Tokenomics

Total Supply

- Total Tokens: 19,700,628

Distribution

- Airdrops and Rewards: 15% (2,955,094 tokens)
- Investors: 70% (13,790,439 tokens)
- Founders: 15% (2,955,094 tokens)

Vesting Periods

- Investors: Dependent on type of investors (e.g., private sale, public sale). Private sale investors have a 1-year vesting with a 3-month cliff, while public sale investors typically have immediate access.

Utility

- The token can be used for governance, payment within ecosystem, and accessing specific services or privileges.

Rewards and Incentives

- Staking rewards for token holders to encourage long-term holding.
- Rewards for participation in the network, specifically social media interaction and potential future use within growing social media app

Inflationary/Deflationary Mechanisms

- No burning or minting of new coins, founder is steadfast that essential total supply remains 19,700,628 permanently

Governance

- Founders and Investors deemed important by Founders will have governance. Utility and importance of XE Coin will increase dramatically

Additional Considerations

- All information related to XE Coin that is not public on blockchain is considered private and proprietary
- X.com handle @XECash will purposively lay low as groundwork is laid and proper liquidity is added from interested parties before public launch
- In negotiations to acquire XECoin.com or similar URL before public launch
